LEAD GENERATION

From Cold Database to $4.2M Pipeline

How Axris Media Solutions built a high-quality B2B lead engine for Dell's SMB division

CLIENT

Dell Technologies

DELIVERED BY

Axris Media Solutions OPC Pvt

2024

Executive Summary

Dell's SMB sales team was struggling with outdated contact lists and low-intent prospects. Axris Media Solutions engineered a multi-channel lead generation system that transformed their top-of-funnel performance within 90 days.

14,800+

Qualified Leads Generated

Avg. Lead-to-MQL Conversion

$4.2M

Attributed Pipeline Value

About the Client:

Dell Technologies is a global leader in IT solutions, serving millions of businesses across 180+ countries. Their SMB division focuses on delivering scalable computing and cloud solutions to growing enterprises.

The Problem We Solved

Dell's SMB division relied on fragmented data sources and cold outreach with poor targeting. Their internal teams were generating high volume but low-quality leads, burning sales resources on unqualified contacts.

The Opportunity

By implementing intent-based lead scoring and integrating third-party B2B data providers, Axris Media Solutions could significantly reduce wasted effort and boost pipeline contribution from marketing.

KEY PAIN POINTS

1 60% of MQLs were rejected by sales due to poor fit

2 Average cost per qualified lead exceeded $145

3 No unified tracking between marketing and CRM data

4 Lead scoring model was outdated and inaccurate

SITUATION BEFORE

Avg. CPL
$145

MQL Accept Rate
22%

Our Strategic Approach

We designed a precision lead generation engine combining intent data, multi-touch nurture flows, and AI-assisted scoring to deliver only the best-fit prospects to Dell's sales team.

1

Intent Data Integration

Layered Bombora intent signals with Dell's ICP profile to identify in-market buyers before they engaged.

3x more in-market signals

2

Programmatic Lead Capture

Built targeted landing page funnels with A/B tested CTAs, gated assets, and smart progressive profiling forms.

67% form completion rate

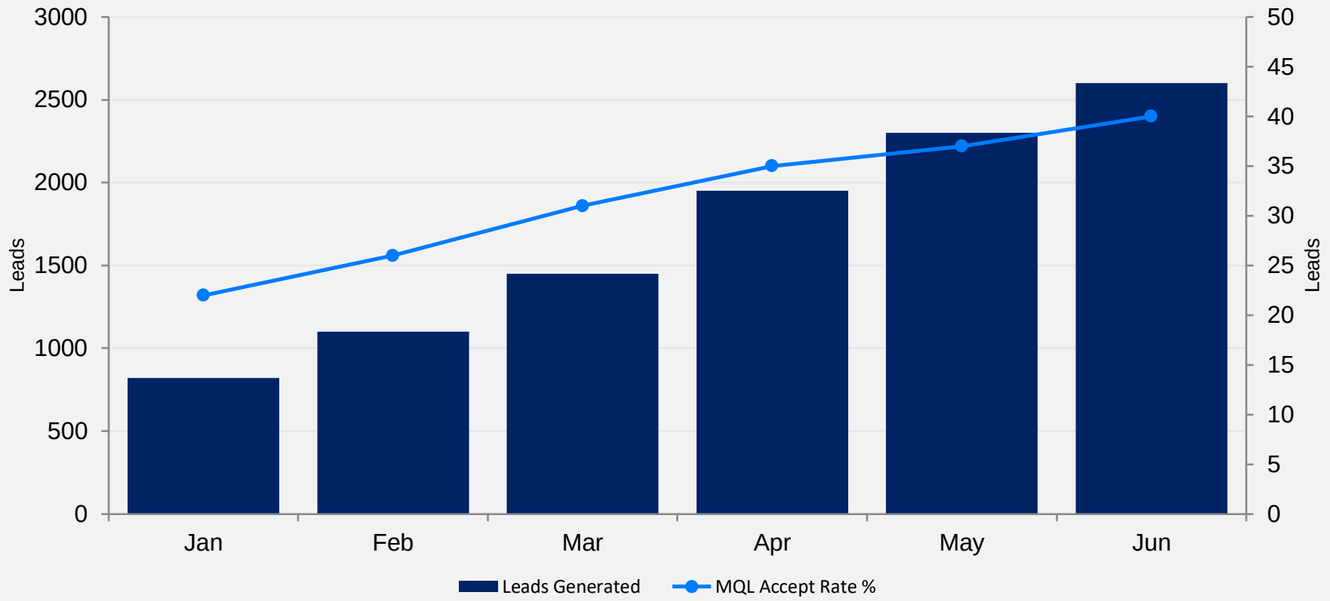

3

AI Lead Scoring Model

Deployed a custom ML scoring model that ranked leads by fit, intent, and engagement recency before CRM handoff.

Score accuracy: 91%

Impact & Performance Metrics

RESULTS AT A GLANCE

+173%

Increase in Qualified Leads

$54

Cost Per Lead (down from $145)

91 days

Time to Full Campaign ROI

Result: 14,800+ leads generated · $4.2M attributed pipeline · 38% avg. conversion to MQL — within one quarter

How We Did It — Campaign Timeline

1 WEEK 1–2

Discovery & ICP Mapping

Mapped Dell's ideal customer profile across company size, tech stack, and buying signals to build a precise targeting framework for all campaign activities and ensure maximum relevance.

2 WEEK 3–4

Data & Tech Setup

Integrated intent data vendors, CRM sync, UTM tracking, and full campaign infrastructure to ensure seamless data flow across systems.

3 WEEK 5–7

Campaign Launch

Activated LinkedIn, paid search, content syndication, and outbound email funnels simultaneously.

4 WEEK 8–12

Optimize & Scale

Used weekly analytics reviews to kill poor performers and scale winning lead sources across all active channels.

Key Takeaways & Benefits

What We Learned

Intent Signals Are Game-Changing

Leads showing active buying intent converted 4x faster than cold outreach targets.

Progressive Profiling Reduces Drop-Off

Multi-step forms increased completion rate by 34% vs. single-page long forms.

Weekly Scoring Recalibration Matters

Refreshing the model weekly based on actual sales outcomes improved accuracy by 18%.

Sales-Marketing Alignment Drives ROI

Weekly syncs between SDRs and marketing reduced lead rejection by 62%.

Client Benefits

Lower Cost Per Lead

Reduced CPL from $145 to $54 — a 63% cost reduction in 90 days.

Faster Sales Cycles

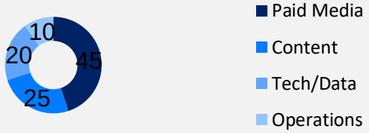

High-intent leads closed 28% faster due to better qualification.

Improved MQL Quality

Sales team acceptance rate rose from 22% to 40%.

Scalable Infrastructure

Lead engine now runs autonomously with monthly human oversight.

Precision Beats Volume. Every Time.

This engagement proved that a data-driven, intent-first lead generation strategy outperforms traditional volume-based approaches — dramatically reducing cost while increasing pipeline quality and velocity.

> "
>
> Axris Media fundamentally changed how we think about demand. The quality jump was immediate — our SDRs were thrilled with what was coming through the system.
